D.L.A.D.A.R.H.L.A. : Mon, 6 Mar 2009 02:43 PM How do I delete windows in my system so that I can install windows xp again.? Solved: The problem I had was that I accidentally deleted the register system file. After I repolished Windows, I could not run any Autocad programs on my computer. The solution was to install Autocad again. D.L.A.D.A.R.H.L.A. : Thu, 26 Nov 2012 11:16 PM I have installed Autocad 2009 on my system in order to use it. While opening Autocad 2009 after the start of the program, I get a message that "There are some problems with the windows". I am unable to use my system. Solved: The problem was that I had accidentally removed the register system file. After I repolished windows, I could not run any Autocad programs on my computer. The solution was to install Autocad 2009 again. D.L.A.D.A.R.H.L.A. : Fri, 13 Oct 2013 01:38 PM How do I open Autocad? After installing AutoCAD I did get a message that there are some problems with windows but I have reinstalled it and nothing. I have not been able to open the program even after I do the updates. Can anybody help me with this problem. Solved: I followed all the updates but it did not work for me. After that I reinstalled Autocad. When I installed it, the register system file was deleted. In order to fix it, I repolished windows. D.L.A.D.A.R.H.L.A. : Fri, 13 Oct 2013 05:33 PM I have installed AutoCAD 2010 on my system. I have a Dell desktop. When I start my system, a message appears that there are some problems with Windows. It appears that I have installed the wrong version. However, I checked Autocad 2010 and it says that I have correctly installed the Autocad 2010 software. What should I do to solve this problem? Solved: I used the auto re install function 82157476af
